## Public Summary

SPHINX is an Innovation Action and demonstration project, wherein effective dissemination and communication is especially important to ensure adoption of the developed technologies during and after the project. The purpose of the dissemination and communication activities is to raise awareness, inform, engage, promote and ensure that the results will be sustained after the project.

This document includes the setup of the project logo and templates, which incorporate the graphical logo which was created uniquely for the project. The templates are created to support project presentations, deliverables, meeting documents and reporting requirements. Usage of standard templates ensures that there is consistency and conciseness in the way work is carried out and presented throughout the project duration. The colour theme of the logo was used to further design the website and communication materials for the project.

The deliverable also shows a detailed overview of the different kinds of contents available on the project website. The website was launched in January 2024, under the domain [www.sphinxproject.eu](http://www.sphinxproject.eu).
